

The LoftHQ Stickman has been designed with simplicity of installation in mind. Either in the joinery shop or on site, no precise joinery machinery is needed.

Tools required for installation:

- skill saw
- plane
- drill/ screw driver

Simply cut the MDF to 45 degrees, plane a 2mm flat on the sharp edge and attach the LoftHQ Stickman.

Suitable for:

- shopfittings
- displays
- retail fixtures
- shop fronts
- bulkheads
- supermarkets
- office fixtures
- kitchens
- numerous joinery applications

Details below show easy adaption to 25mm, 18mm, 12mm and 9mm MDF or slat panel products.

Available ex stock in mill and anodised aluminium from LoftHQ in 3700 lengths.
